

VICTORIA ALICIA TORRES, PHD

Research Post-Doctoral Fellow, Baylor Scott & White Health

PERSONAL STATEMENT

My professional journey has been deeply rooted in my intrinsic mission—to connect underserved populations to high-quality, evidence-based mental healthcare. My commitment to this mission has been shaped by the invaluable mentorship I received as a clinical research assistant from 2014 to 2016 at the Warriors Research Institute (WRI) of Baylor Scott & White Health, where I secured my first mentored grant award. Returning as a research post-doctoral fellow, I have continued refining my professional skillset to advance this central objective. Throughout my academic journey, I have demonstrated an unwavering commitment to excellence, culminating in my recognition as the "Psychology Clinical Intern of the Year" in 2022. This acknowledgment exemplifies my dedication to surpassing expectations and achieving the highest standards in my clinical practice.

The WRI's work and professional environment echoes a core belief: occupations can serve as a vital conduit linking individuals, families, and communities to essential support and valuable resources for overall well-being. My research aims to underscore and extend this reach by optimizing healthcare delivery, particularly for those encountering significant barriers to access.
