**Safety:**

Your safety is our top priority. During your stay you will find that staff in each department will perform numerous safety checks before surgery, including:

- Asking you verbally to provide your name
- Checking your patient identification band
- Confirming the type of procedure you are having
- Asking you for the surgical site location.

Confirming, and re-confirming, that your responses match the medical chart, identification bands and labels, and information provided by your surgeon, is for your safety and helps to eliminate confusion or misinformation.

**Communication:**

By speaking with you before you arrive for surgery and discussing testing, responsibilities, and costs we hope to cause minimal disruption for you and your family on the day of surgery, and help promote a more restful, disruption-free stay.

To that affect, you may receive multiple calls beforehand asking for additional, or verification of, health and financial information:

- PRE-ADMISSION TESTING. Nursing staff will arrange an appointment (in person or by phone, depending on surgery type) to review your medical history and complete any tests your surgeon has requested (such as lab/blood work; EKG; X-rays, etc.) prior to surgery. Baylor Dallas Pre-admission Testing – 214.820.6200
- PRE-REGISTRATION. Staff from the hospital’s business office will call to arrange your admission to the hospital, complete insurance paperwork, discuss deductibles, copayments or out-of-pocket expenses. Baylor Dallas Business Services – 214.818.9700 or 877.810.0372
- PHYSICIAN/SURGEON’S OFFICE. Your surgeon will advise when to arrive at the hospital; about eating before surgery; and any medication restrictions.
