

Celebrating **Five Years** and Still Growing

On July 6, 2012, Baylor Medical Center at McKinney, now known as Baylor Scott & White Medical Center – McKinney, opened its doors to our first patient. In the last five years, we have become an integral part of the community, providing care for nearly 31,000 patients, supporting approximately 148,000 emergency room visits and delivering more than 8,300 babies.*

And we're still growing:

- Doubled the size of our emergency department
- Built out the fifth floor to include a dedicated orthopedics unit
- Added a second physician office building
- Expanded parking on our campus

Our advanced expertise in treating patients experiencing stroke and heart attack has earned us a Primary Stroke Center designation and full Chest Pain Center Accreditation. We have also received accreditation from the Commission on Cancer of the American College of Surgeons because of our quality, comprehensive cancer care. Our Magnet® Recognition means our nursing staff ranks among the top seven percent in the nation. Lastly, we have been designated a Baby Friendly facility for our commitment to promoting newborn health.

At Baylor Scott & White – McKinney, our roots are deep. Our commitment is strong.
