

Skilled Nursing Services

After surgery or a severe illness, a patient may need professional care to aid in recovery transition from hospital to home. One Medicare-covered post-acute care benefit is skilled nursing facility coverage. Baylor Scott & White Medical Center – Taylor is unique in offering this level of post-acute care, or “swing bed service,” not available at most acute care hospitals.

Our services benefit patients convalescing from illness or injury such as:

- Stroke
- Heart attack
- Cardiac surgery
- Hip and knee replacements
- Pneumonia
- Wound infections
- Dehydration

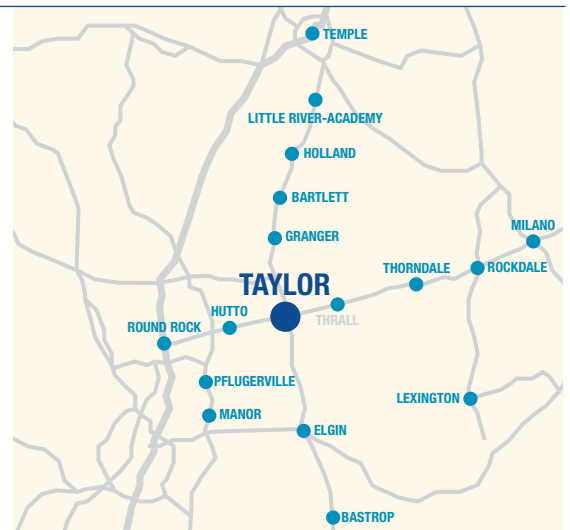

The professional skilled nursing staff at Baylor Scott & White Medical Center – Taylor can provide a complete spectrum of care for your recovering patients (as prescribed by a physician):

- Physical therapy*
- Occupational therapy*
- Speech therapy
- IV medication administration
- Respiratory therapy
- 24-hour skilled nursing care
- Wound care

* Offered twice each weekday and once a day on Saturday for strengthening, mobility training, advanced wound care, balance or vestibular rehabilitation

The convenience of having a local skilled nursing facility is very important to the patients and families of our community.

Let Baylor Scott & White Medical Center – Taylor work with your facility to coordinate skilled nursing services and other skilled care for rehab patients.
